

AWS Service Delivery Program

HOW TO APPLY:

Amazon QuickSight Service Delivery designation

Amazon QuickSight Partners leverage deep technical experience in combination with demonstrated knowledge of related AWS services to deploy Amazon QuickSight, a fast, cloud-powered business intelligence (BI) service that makes it easy for customers to deliver insights to everyone in their organization. They do this by helping customers connect to their data, manage users, create dashboards and embed them into portals, applications and websites.

In order to qualify, interested APN Partners must meet the Amazon QuickSight Service Delivery Program requirements and complete validation by the AWS Service Delivery Program team.

Who should apply?

- APN Partners who already work with related data services and sources, such as Big Data & Analytics, IoT, Migration Partners
- APN Partners with excellent case study references that include QuickSight visualizations

April 15, 2019

Application deadline for Partner inclusion in launch announcement

Completed applications received after April 15 will be reviewed against the same criteria but approved Partners will not be included in the official program launch announcement.

Why become an AWS Service Delivery Partner?

AWS Service Delivery Partners receive preferred access to service trainings, webinars, and events to help them further develop their capabilities with AWS services; public designation on the AWS website; and promotional activities to help them grow their existing business and connect with customers.

Partner Application Instructions

1. Review the Amazon QuickSight Validation Checklist:
 - [Validation Checklist: Service Delivery Program](#)
2. Submit your Practice and Microsite URL via APN Partner Central
 - Log in to APN Partner Central
 - Click "View My APN Account"
 - Scroll down to the practice section
 - Click "New" to add your practice
 - Provide the details for your Practice submission, Microsite and Company Practice Description
 - Save your practice and Microsite
3. Submit two Amazon QuickSight References via APN Partner Central
 - Log in to APN Partner Central
 - Go to the "View My APN Account" Page
 - Scroll to the references section
 - Click "New" to add your references
 - Include the details required that are listed on the validation checklist within your reference submission
 - Work start and end date
 - AWS Account ID
 - Clearly detailed Case Study with use case details
 - Clearly detailed Proposed Solution and Architecture, with screenshot of dashboard included
 - Well defined Metrics for Success
 - Lessons Learned
 - Add architecture diagrams to your reference
 - Save
4. Send the URLs from APN Partner Central references and microsite, along with copies of your validation checklist to your AWS Partner Manager (PDM).
